### **Combined Products Engineering Project Insurance Cover (EPIC)**

In some projects the sums insured for the construction and erection part of a project can be roughly equal. This calls for the issuing of two separate policies – one for the construction work and one for the erection of the machinery. A combination of the Contractors All Risk insurance (CAR) and Erection All Risk (EAR) policies is a possible way to close any gaps in the cover and to reduce administration policy.

### **Seamless cover**

The combined Marine, Marine Advance Loss Of Profit, Contractors All Risk, Advance Loss Of Profit, Travel, Riot wrap, Liability, Professional Indemnity, Assets and Business Interruption insurance under one policy offers seamless specialist cover.

The financiers require seamless cover that combines all project risks under one policy with no gaps between policies and insurers.
